

# Dementia Friendly Massachusetts Initiative

## BACKGROUND

An estimated 5.4 million people in the United States and more than 130,000 Massachusetts residents are living with dementia, which is a general term for changes in thinking such as memory loss and difficulty planning and communicating. Dementia may be caused by Alzheimer's disease or other conditions. Despite the widespread impact of dementia, lack of information, fear, and stigma can prevent those affected from feeling safe, socially connected, and able to thrive in their communities.

## DEFINING DEMENTIA FRIENDLY

By working together, we can make strides in supporting individuals living with dementia as well as their friends and families. A "dementia friendly community" is informed, safe, and respectful, and enables people living with dementia and those who care about them to live full, engaged lives.

## IN MASSACHUSETTS

We are building upon the work of the Age-Friendly movement, which benefits people of all ages by supporting community standards for inclusion, access, safety and engagement. In this way, communities that are age-friendly and dementia friendly embrace everyone – younger people, older people, individuals with and without dementia, individuals with disabilities of all kinds.

Participants include citizens from all walks of life, faith leaders, first responders, businesspeople, town government members, and more. Massachusetts is an "early adopter state" in the dementia friendly communities movement – more cities, towns, cultural groups, and other self-defined communities are becoming involved every day!

## Dementia Friendly Massachusetts

*Dementia Friendly Massachusetts is state-wide, grassroots movement comprised of organizations, individuals, and municipalities growing dementia friendly communities to become more inclusive and supportive of those living with dementia, their families, and care partners. Dementia Friendly Massachusetts is a member of Dementia Friendly America and is generously supported by Tufts Health Plan Foundation.*
